

MOHSEN KARIMVAND

Senior Frontend Developer

+989196404757 m.karimvand.84@gmail.com mohsenkarimvand.ir linkedin.com/in/mohsenkarimvand Tehran, Iran

SUMMARY

Senior Frontend Developer with 3 years of production experience in React, TypeScript, and Next.js, currently leading frontend on a real-time IoT and fleet platform. Structures apps by feature, uses TanStack Query for server state and Zustand for client state, and treats loading, error, and auth as part of the UI. Day-to-day work covers Core Web Vitals, GitLab CI, and shipping with Cursor and Claude.

EXPERIENCE

Senior Frontend Developer / Team Lead

Fara Ofogh Company

Apr 2025 – Present

- Promoted to frontend lead within the first year. Own architecture, code review for the vehicle-tracking and IoT platforms.
- Architected a Turborepo monorepo (5+ apps and shared packages, feature-based layout) and shipped it with multi-stage GitLab CI and Docker, one production image per app.
- Built 50+ React components, including compound components, and a MapLibre map rendering 5,000+ vehicles over SignalR, with effect and subscription cleanup on long-lived sessions.
- Improved LCP, INP, and CLS on the latest app. Server state is on TanStack Query, with explicit loading and error states.
- Added frontend unit tests with Jest, Vitest and React Testing Library for 40+ critical flows, plus Playwright end-to-end tests.
- Set auth to httpOnly cookies and treated untrusted input as an XSS boundary. Shipped a dark theme with readable contrast, semantic HTML, control labels, and keyboard access.
- Use Cursor and Claude daily (AGENTS.md, Cursor rules, Figma MCP); generated diffs go through the same review before merge.

Frontend Developer

Dubz Startup Company

Jul 2024 – Mar 2025

- Led frontend for a real-estate platform used by 1,000+ property managers and agents, including the Next.js B2C site: React Server Components, streaming with Suspense, a server/client split, and semantic HTML for SEO.
- Built 10+ forms with React Hook Form and Zod, each validated from a single schema.
- Shipped a PWA with offline caching that cut redundant API requests by 50%, and cut the initial bundle by 60% with lazy loading and code splitting.

Frontend Developer

Manzookeh Negaran Holding

Sep 2023 – Mar 2024

- Built the accounting module of a B2B SaaS product (2,000+ users, 100+ companies) and 10+ workflows in task management.
- Shipped two production marketing sites from Figma, for an IoT company and a UAE aviation company, with semantic HTML for SEO.
- Mentored frontend developers in a Tailwind CSS training series for teams at three companies, and built a VS Code extension used by 15+ developers.

SKILLS

- Languages:** TypeScript, JavaScript, HTML, CSS
- UI:** React, Next.js, React Server Components, Suspense, Tailwind CSS, MUI, shadcn/ui, Ant Design
- State and forms:** TanStack Query, Zustand, React Hook Form, Zod
- Testing:** Jest (frontend and Node.js), Vitest, React Testing Library, Playwright, Go unit tests, MSW
- Delivery:** Vite, Turborepo, pnpm, GitLab CI, Docker, Git, Storybook
- Practices:** feature-based architecture, compound components, Core Web Vitals, accessibility (semantic HTML, labels, keyboard access, contrast), SEO, XSS, httpOnly cookie
- AI:** Cursor, Claude, MCP (including Figma), AGENTS.md, Cursor Rules
- Backend:** Node.js, Go, REST

EDUCATION

Bachelor's Degree in Computer Engineering

Islamic Azad University, North Tehran Branch

In Progress (started 2023)
