SUMMARY

Frontend Engineer with 3+ years of professional experience building scalable web applications with React, TypeScript, and Next.js. Experienced in high-performance enterprise dashboards, real-time GIS platforms, frontend architecture, testing, and CI/CD, with additional backend experience in Node.js and Go.

EXPERIENCE

Frontend Developer

Fara Ofogh Company

Mar 2025 - Present

- Built nationwide fleet and IoT platforms using React, TypeScript, Vite, Tailwind CSS, Ant Design, and MUI.
- Improved frontend performance by optimizing Vite/React 19 builds, increasing Lighthouse scores from 50 to 95 and reducing bundle size by ~80%.
- Engineered a real-time GIS system with MapLibre, WebSocket, and SignalR, rendering 5,000+ live data points with sub-100ms latency.
- Architected scalable frontend infrastructure with Turborepo, Storybook, and type-safe API layers, reducing cross-package build times by ~80% and maintaining 20+ reusable components.
- Strengthened quality and delivery workflows with 50+ Playwright/MSW integration tests, GitLab CI/CD, Docker, Husky, and Semantic Release, reducing deployment time from 20 to 4 minutes.

Frontend Developer

Dubz Startup Company

Jul 2024 - Apr 2025

- Architected and developed a responsive real estate management platform using React.js, Next.js, and Tailwind CSS, with a performance-focused frontend architecture supporting scalable feature development.
- Reduced initial JavaScript bundle size by ~70% through code splitting, lazy loading, and tree shaking, improving application load performance and user experience.
- Implemented PWA capabilities with offline support and installable experiences, improving accessibility and enabling users to interact with key application features in low-connectivity environments.
- Engineered a multi-step property listing workflow using React Hook Form and Zod, with client-side validation, custom file uploads, and drag-and-drop image reordering.

Frontend Developer

Manzoomeh Negaran Holding

Sep 2023 - Feb 2024

- Developed and launched Task Management and CRM modules for a large-scale ERP platform serving 2,000+ users across multiple teams, using modern frontend technologies.
- Built a responsive IoT services and products website with a structured product catalog, reusable UI components, and responsive layouts across desktop and mobile devices.
- Developed and delivered an international service website for a UAE-based aviation agency, focusing on responsive design, usability, and cross-device compatibility.
- Collaborated with UI/UX designers and backend engineers to integrate REST APIs, translate designs into reusable frontend components, and participate in Agile sprint planning and delivery.
